

Quartz 25 mm diameter Cuvette

Instrument Calibration

Instrument Calibration: 1) Correlation to External Method

Name of external analysis method _____
(Please attach calibration look-up table or graph.)

2) Calibration with Hydrocarbon Standard

Type of hydrocarbon standard _____

Concentration of hydrocarbon standard _____.

If crude oil or condensate, what is the API rating _____

3) Check Point™ Solid Standard

Concentration setting of Solid

Standard _____

What analysis method was used on calibration sample for setting the solid standard _____.

FastHEX™ Procedure

Solvent for extraction: Hexane

Other Name _____

Volume of water sample extracted: _____

Volume of solvent used in extraction: _____

Instrument Diagnostics

From the HOME screen, press <8>.

Sens %: _____ %

Raw: _____

Now press <ENT>.

Opr: _____ Hrs

Pwr level: _____ %
